

PROCEMS

PROCEMS provides customer-specific solutions for all emission monitoring needs. We integrate a wide range of measuring principles to provide complete and customized emission monitoring solutions.

The **MGA 23 gas analyser** model is backed by the latest German technology and is built to the strictest environmental regulations.

Easily integrated into most emission analysis systems, its reliability has been proven in various industries notably in power generation.

Providing Solutions for
POWER GENERATION

FEATURES

19" - rack with 4 analogue outputs

Automatic calibration with ambient air

Simple assembly with one to one substitution into the analysis cabinet

Simultaneously measure up to 3 or more gas components

TUV - certified

Minimum maintenance

Renowned market acceptance

PROCEMSTM

complete emission monitoring specialist
